

please do not get rid of the traffic and weather station on xm satalite radio. i am constantly on the expressway and always listen to it while i am driving to get on it to see how long its gonna take me to get to work. i also love to know about any storms with listening to weather. with the recent tornado warnings we've had here last week it was great to know about when the warnings were until and such. please do not do away with these traffic and weather stations.
